

# INSTRUCTIONS

## mobile instructions:

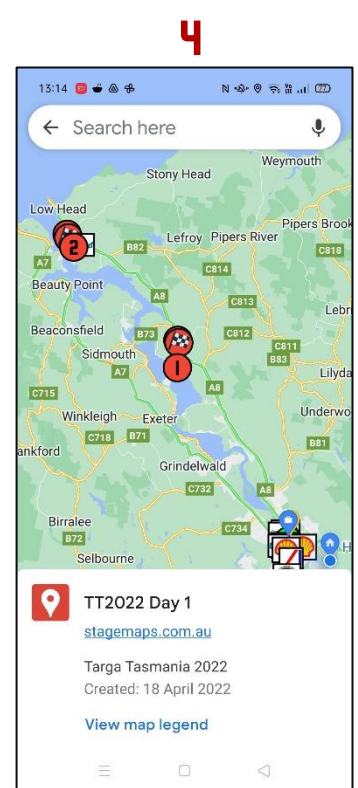

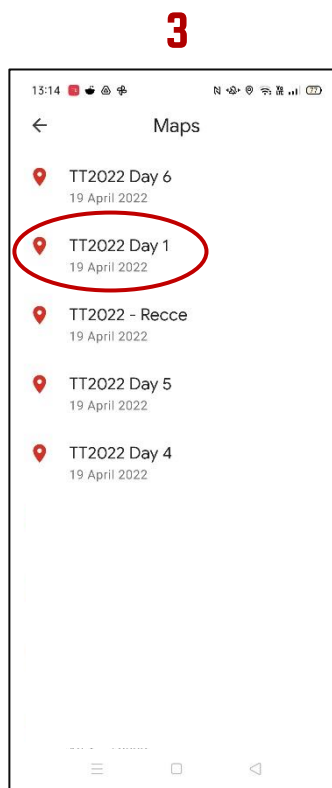

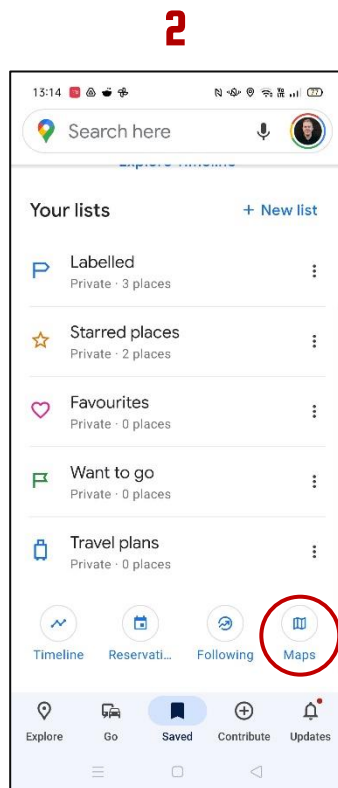

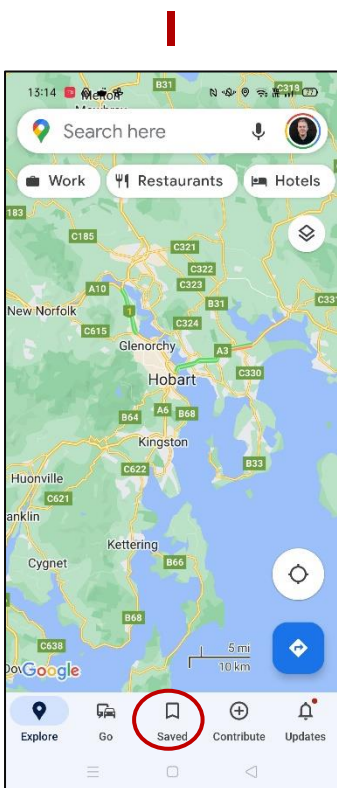

### 1. loading my maps for the first time:

1. Open the document you received (in your email), on your phone or tablet (whichever device you will use during the event)
2. Click on the relevant map you wish to open.
3. If the link opens in Google Maps you have installed the map on your Google Account.
4. If the link opens in your browser (e.g. Chrome or Safari), click the button on the top right, and follow the prompts which will then open the map in Google Maps

- Once opened in Google Maps, they should remain attached to your Google Account.
- Repeat for the other map links.

### 2. accessing maps after opening first time:

1. Open the Google Maps App and click **Saved**.
2. Scroll to the bottom of the page and click **Maps** on the bottom right.
3. Select your relevant map – in this example **TT2022 Day 1**.
4. Your map is now ready to use!

# INSTRUCTIONS

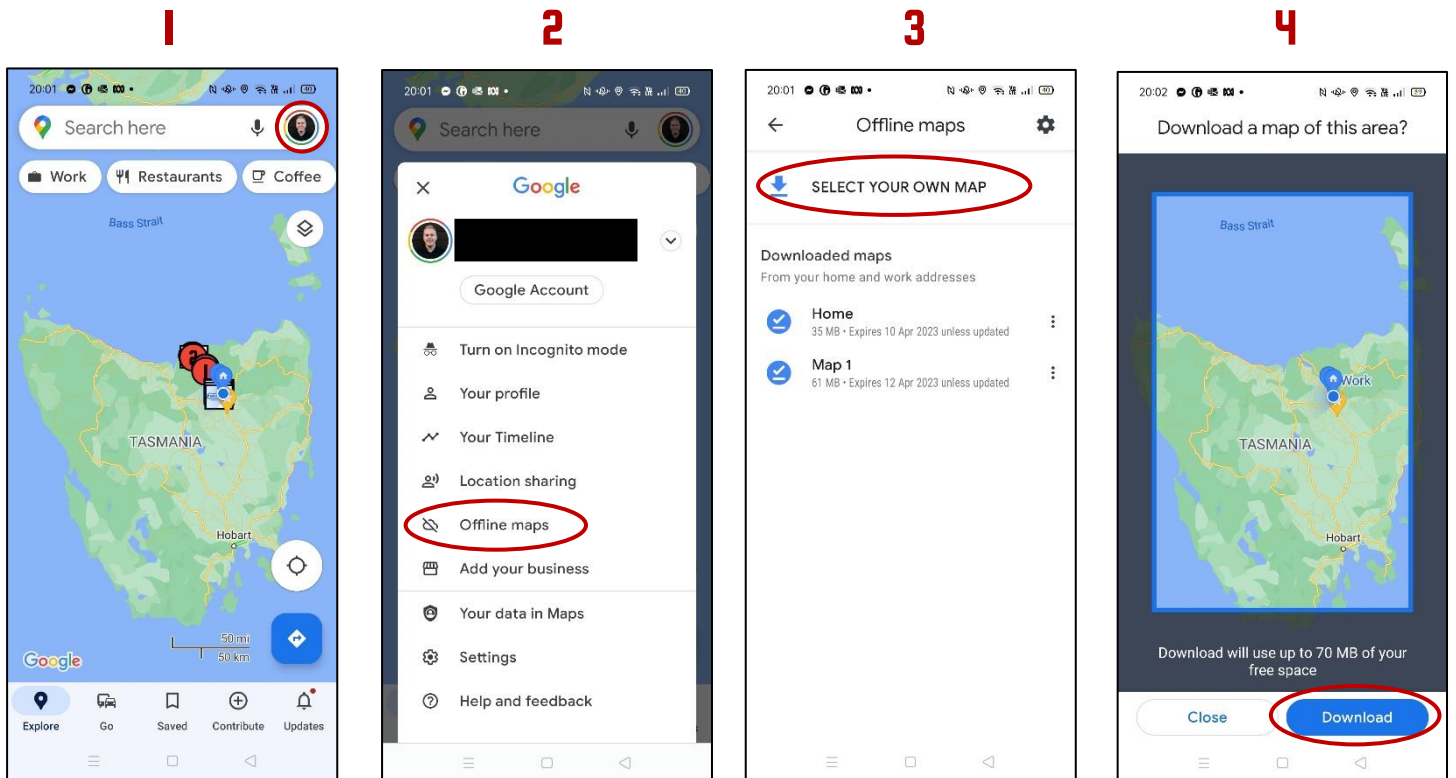

## 3. save map area for offline usage

If you wish to save the map area for offline usage so it is accessible during periods of no mobile phone service (***highly recommended!***), follow this tutorial.

1. In Google Maps, **click your profile logo** on the top right of the screen
2. **Select offline maps** in the menu (note: personal data has been blacked out)
3. Click **“select your own map”**
4. **Select the area** you wish to download and **press download**.

*If you are unable to get all of the required area in one selection – press download, and then go back to step 3, reselect the area you couldn't get within the selection and download the second area.*

**Note:** Saving the map area will only save the "base map" - no icons for stages/service etc. We recommend not shutting down the Google Maps app whilst in locations with no reception (you can still use other apps whilst keeping Google Maps going in the background to ensure you don't lose the overlay of information).

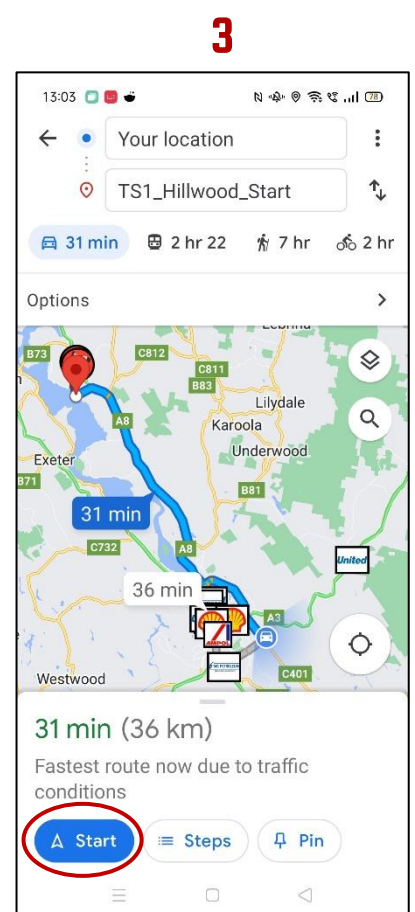

# INSTRUCTIONS

## 4. guide to icons

ICON	DESCRIPTION	ICON	DESCRIPTION
	Stage start (with stage number)		Restricted Zone Start
	Flying Finish		Restricted Zone Finish
	Stop Point		SOS point on stage
	Service Zone / Lunch Stop		Remote Refuel Location
	Service Station (98 octane available, brand shown, and opening hours listed)		Event logo (depicts HQ or start/end of day location)

## 5. navigating using google maps:

1. **Click on the icon** you wish to navigate to, e.g. the start of stage 1 (noted by the 1 in the red circle).
2. Click **Directions**.
3. Confirm that your start point and destination are correct and press **Start**.

# INSTRUCTIONS

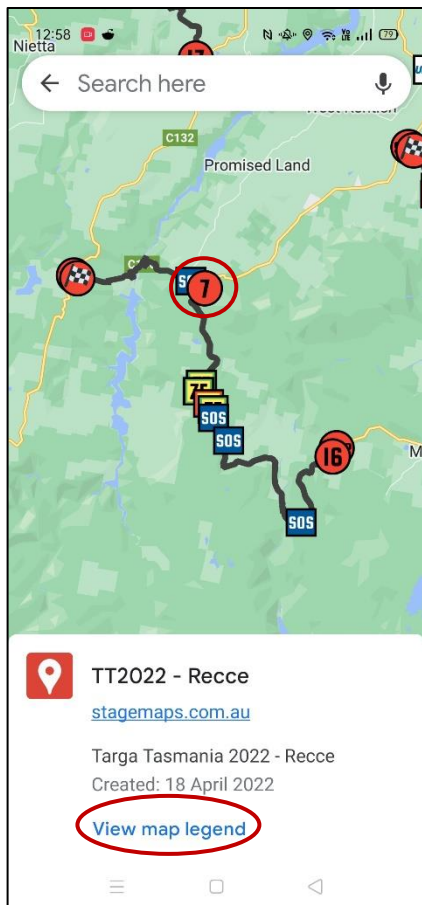

## 6. toggle map layers:

Sometimes rally stages are used in multiple configurations, such as the Mt Roland (7) and Cethana (16) stages in Targa Tasmania. They have their own starts, flying finishes, SOS and restricted zones. To view each individually, we can toggle the layers.

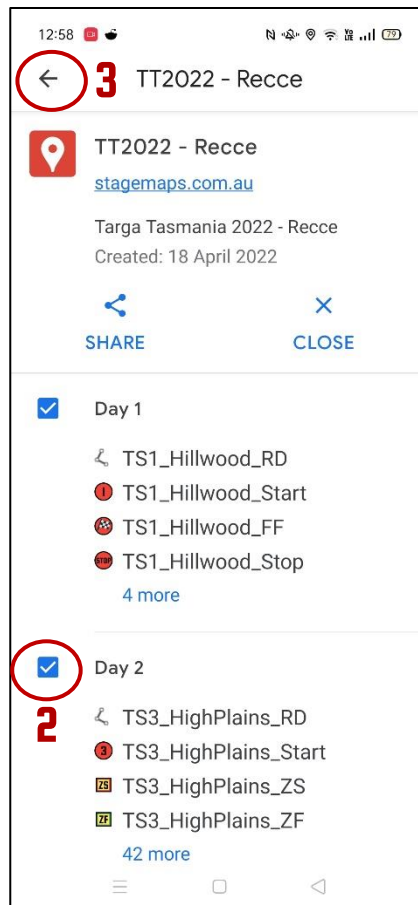

In this case, the Mt Roland stage (7) is on day 2, and Cethana (16) is on day 4.

1. **Select an icon** on the map, and click **View Map Legend**
2. **Deselect** what you do not wish to see on the map...
3. and **use the back button** to head back to the map. Do not select close as it closes the entire map down and you will need to reopen it (*see 2. accessing maps after opening first time*)
4. **Keep pressing the back button, or alternatively, press the Explore button** to take you back to the home page.
5. Now we can see that only stage 16 (Cethana) is viewed, as we have toggled off Day 2 which contained stage 7 (Mt Roland).
